<tr>
<th>14TH FIVE-YEAR PLAN TARGETS</th>
<th>POLICY FOCUS</th>
</tr>
</thead>
</table>
| **CARBON PEAKING and NEUTRALITY** | • Align with the national targets for energy intensity  
• Continuous reduction of carbon intensity  
• Pushing to achieve earlier carbon peaking for capable regions and industries |
| **ENVIRONMENTAL TARGETS** | • Control agricultural methane emissions |
| **ENERGY SUPPLY** | • Focus on the construction of new nuclear, offshore wind, pumped storage, solar PV, and natural gas facilities  
• Integrate solar PV, microgrids, energy storage, and smart energy  
• Construct new 500 kilovolts (kV) electricity transmission lines  
• Develop the hydrogen fuel industry  
• Develop the local solar PV and energy storage equipment production capability  
• Develop carbon storage and sequestration capabilities  
• Support the renovation and development of flue gas treatment and volatile organic chemicals (VOCs) treatment equipment |
| **TRANSPORTATION** | • Prioritize public transportation and ridesharing  
• Accelerate the construction of electric vehicle charging and hydrogen refueling stations  
• Develop the local electric vehicle and hydrogen vehicle production capability |
| **INDUSTRY** | • Regulate and retire high-energy consumption facilities  
• Reinforce and enforce energy conservation requirements  
• Enforce differential pricing for electricity  
• Develop advanced, digital, and green manufacturing capabilities |

- Align with the national targets for % of days with satisfactory air quality in major cities  
- Continuous reduction of all major air pollutants  
- Reduce methane emissions  

- Achieve a total generation capacity of 80 gigawatts (GW) by 2025  
- Increase the percentage of electricity production from non-fossil fuel sources  

- Promote the use of public transportation  
- Promote the use of zero-emission vehicles  

- Reduce overall energy consumption and carbon emission  
- Continuous reduction of all major air pollutants
