Jiangxi Province | 14th Five-year Plan Subnational Climate Policy Brief | June 2022

	14TH FIVE-YEAR PLAN TARGETS	POLICY FOCUS
CARBON PEAKING and NEUTRALITY	• Achieve carbon peaking by 2030 and carbon neutrality by 2060	
ENVIRONMENTAL TARGETS	• Fine particulate matter concentration will reach 29 mg/m3 in cities and 24.8 mg/m3 in cities above county level • Percentage of days with good air quality will reach about 94% in cities and 95.2% in cities above county level • Proportion of Class III surface water will reach 95.5% • Nitrogen oxide emissions reductions will reach 2.74 tons • Volatile Organic Compounds (VOCs) emissions reductions will reach 1.41 tons	• Control greenhouse gas emissions from industry, transportation, and construction • Strengthen the synergistic control of fine particulate matter and ozone pollution
ENERGY SUPPLY	• Proportion of coal consumption in primary energy consumption will decrease to less than 58% • The installed capacity of wind power, solar, biomass will reach 7 million kilowatts, 11 million kilowatts, 1 million kilowatts or more, respectively.	• Adjust energy supply structure • Control the total amount of coal consumption • Encourage the development of clean energy • Accelerate the construction of modern energy system
TRANSPORTATION	• Carbon dioxide emissions per unit of transport for operating vehicles and ships will decrease by 4% and 3.5%, respectively • By 2023, 10% of public parking spaces in public transit hubs will be equipped with charging facilities • The percent of new energy vehicles in newly purchased and newly updated buses, taxis, and delivery vehicles	• Green transformation of the transportation system • Promote smart energy infrastructure development
INDUSTRY	• Energy consumption per unit of Gross Domestic Product (GDP) will decrease by 14.5% • Carbon dioxide emissions per unit of GDP will decrease by 19.5% • 3-5 national-level green industry demonstration areas, 20 industrial parks, 100 green plants will be built	• Promote low-carbon transformation in industries through new technologies
BUILDING	• Proportion of green building area in new buildings in cities and towns will reach 100%	• Promote green building and the use of renewable energy in buildings
